**CMO is a non-profit organization that welcomes all riders.**

**Competitive Mounted Orienteering** is a mounted, timed event where the goal is to find 5-10 markers using a set of written clues on a map (provided) and an orienteering compass. You may ride as an individual or in teams and go at any pace you like. Teams are released 5-10 minutes apart. The winner is the person or team who finds the most markers in the fastest time. Number of markers found counts more than time in determining placing.

We provide a practice marker to find in the campground on foot before the ride. Orienteering compasses are available at many stores that carry camping equipment. (We have a few loaners.) Our chapter also has mentors who are willing to ride or work with persons who are new to the sport.

The Middle Fork area is large and scenic. Trails vary from grassy and flat to wooded and hilly, with stream and river crossings. All riders are strongly encouraged to wear helmets.

The campground is on 2250 N. From IL 1-74, get off at exit 206 (Oakwood). Go north through Newtown, then watch for campground sign on the left for a right turn. From IL Rt. 49 headed south or IL 136, the best way is through Collison. From there, go east to 900 E. then turn south and watch for campground sign on the right for a left turn. From northern Indiana, it's just as fast to go to I-74 as through Collison.
